WORK EXPERIENCE

SOFTWARE ENGINEER (INTERNSHIP)

Innovative Foods Company

Jul 2023 - Aug 2023

- I worked on creating an application for tablet using Power App Platform to export invoices with their information in PDF format from the branches to the administration in an organized file manner.

SOFTWARE ENGINEER

AMNOON SECURITY CONSULTING

Jan 2024 - Present

- Working on creating the website for Amnoon Company using Front-end languages.
- Working on improve and update the website.
- Working on create a website to solve invoices problem.
- Working on planning and implementing software projects that solve problems.

SKILLS

- Programming Languages: HTML/CSS, JavaScript, PHP, Java, Dart
- Framework: React, Flutter
- Databases: MySQL
- Version Control: Git, GitHub

PROJECTS

Invoice Uploader

- The PowerApp application allows branches to upload invoices to a SharePoint Library in a dedicated file for each branch.
- It also enables viewing of previously uploaded invoices for the branch.

Amnoon Invoice Management

- The web application solves the problem of collecting purchase invoices.
- The first page is for the user to upload invoice details along with a picture of the invoice.
- The second page is for the accountant to verify that the entered data matches the invoice. If it does, they can click the "Submit" button to save it to the final list, or the "Delete" button to remove the invoice if it does not meet the requirements.

Amnoon Website

- Website for Amnoon Security Consulting Company.

Pomonote App

- A mobile application with three main sections: Home Page, Notification Page, and Timer Page.
- Home Page: Provides buttons for navigating to the Notification and Timer pages.
- Notification Page: Allows users to choose a date and enter a note, sending a notification with the note on the selected date.
- Timer Page: Starts a 25-minute timer, followed by a notification to take a 5-minute break.
